

NOTICE REGARDING JOBSITE DELIVERY

If you request a jobsite delivery from The Coeur d'Alene Window Company for either new construction or replacement, we deliver in large 26' long box vans. Our trucks are heavy. A properly built and poured driveway should be able to support the truck's weight. If you suspect your driveway is not capable of supporting a large truck. Please notify us immediately.

Coeur d'Alene Window will not be held responsible for driveway damage incurred.

We can hand load your windows for an additional fee or you may pick your windows up.

Also, it is the responsibility of the builder, contractor or homeowner to see that the delivery area is free of low hanging trees and wires.
