BLINDS + GLASS

BLINDS

Building upon their 75+ year history of developing IG panels for doors, ODL continues to innovate in the blinds-between-glass category, where they have been the industry leader for over 20 years. Their industry relationships led them to discover that manufacturers, builders and homeowners wanted a simple solution that addressed and solved concerns about the safety, cleaning, and lack of ease associated with traditional blinds. That's why ODL created a modern alternative to traditional blinds.

1

Cordless blinds between glass

2

Color-coordinated components match frames and home decor

3

Low-E and Dual Low-E options available to meet your energy needs

4

Contemporary fingertip controller for raise, lower, tilt functions
