

## **POLICY REGARDING COMMERCIAL PROJECTS REQUIRING SITE WATER TESTING**

The Coeur d'Alene Window Company will not warrant product on fully installed projects that require water testing that is performed after all product is installed.

We require that an initial window be installed and tested unless the specific configuration and size are already AAMA tested.

Further, we strongly recommend that AAMA testing be requested and performed on any configuration prior to its use in a multi-family/large commercial environment.

It is the responsibility of the purchaser or Coeur d'Alene Windows to notify the company prior to use if additional testing (lab or on site) is required or recommended.
